DUNE REVOLUTION: STI RELEASES NEW VORTEX V-ROLL UTV SAND TIRE

STI Tire & Wheel is transforming sand tire technology with the introduction of the all-new Vortex V-Roll line of tires. The Vortex V-Roll is a game changer for owners of large displacement UTVs, a sand tire designed specifically for big-bore side-by-sides.

Key to the effectiveness of the V-Roll is its sizing. This lightweight, 4-ply tire is being introduced in a **27x11-14 front** and a **27x14-14 rear**. These sizes result in a super-wide, high-flotation footprint that keeps the machine on top of the sand instead sinking in. Mounting on a 14-inch wheel also achieves a very low-profile sidewall, which enhances handling by minimizing tire flex and lateral roll. The

sizing ensures proper front and rear brake clearance for all popular UTV applications. And there's no denying the "cool" factor of the many popular and stylish 14-inch wheels on the market today (including STI's own HD Alloy Series).

The 11-inch-wide front V-Roll features a rib to provide excellent steering response and minimal rolling resistance. The 14-inch-wide rear V-Roll uses eight paddles for an ideal balance of traction and handling. The paddles are molded in, which greatly increases durability.

The Vortex V-Roll is very competitive

in terms of both performance and pricing. It even comes standard with a one-year manufacturer's limited warranty.

PERFECT FOR LARGE DISPLACEMENT UTVs

STI Vortex V-Roll tires are available at finer ATV/UTV dealers everywhere, through MTA Distributing. For more information, to place an order or to locate an STI dealer, visit www.stitireandwheel.com or call: East (318) 255-0049; West (951) 272-0971.
