SLIME

- SLiME Tube Sealant is formulated and tested for use in all tube tires.
- Once installed, SLiME remains liquid and will not harden or dry out.
- As the treated tube rotates, centrifugal force pushes the sealant to the tread area creating a layer of protection, repairing punctures.
- Not intended for use in tubes losing pressure from sidewall punctures, bead leaks, damaged rims or faulty valves.
- SLiME for tube type tires is NOT recommended for use in tubeless tires.
- Prevents and repairs punctures up to 1/8" (3mm) using Fibro-Seal™ technology.
- Remains liquid inside the tire, coating the tread area as the tire rotates.
- Non-toxic, non-hazardous, non-flammable, non-aerosol and water soluble.
- Tubes treated with SLiME can be patched with a conventional vulcanized patch using a bit of patience and care!
- SLiME has a freeze point of -30°F (-34.4°C) and a boiling point of 220°F (104.4°C).
- Guaranteed or 2 years.
