Billy Who Factory Fill Bottle

- Eliminates searching the manual for oil capacity and allows you to fill your oil without the use of a funnel.
- Bike specific oil fill system, not only allows you to measure volume but also offers a spill and clean-up free transfer to the engine and transmission.
- Fill the bottles at home and take them to the track to eliminate trackside measuring frustrations.
- Because it is a sealed environment you will ensure your oil is free from dust and other contaminants in the air.
- There are three Factory Fill bottles that accommodate most modern 2 and 4-stroke motorcycles and ATV's and a Honda package with a motor bottle and a transmission bottle for the CRF and TRX split case bikes and ATV's with oil capacity not exceeding 1.3L.
- Each bike model on the motor bottle has two fill levels machined into the bottle.
 - 1) Capacity at oil change with oil filter replacement.
 - 2) Capacity at periodic oil change without filter replacement.
