New ATV sport rotors

Made in the UK from laser cut stainless steel, the new lightweight CONTOURED profile ATV sport discs are a lighter weight unit than original parts and designed for sport and race use. All discs are precision ground and made to the exact same sizes as original parts as a direct bolt on replacement

OVERSIZE ROTORS

This extremely popular range of oversize rotors has become a worldwide number one seller. The optimum 280mm design gives a significant improvement to stopping power but also great modulation/control without the risk of 'grounding' on excessively over diameter units. The rotors are quick and easy to fit with beautifully crafted brackets made by Ted Devol in the United States, available for all recent modern moto-x machines.
