FUEL / AIR ACCESSORIES

DYNOJET POWER COMMANDER

- Provides precise information for fine-tuning a fuel-injected motorcycle when changing an air filter, installing a new exhaust system or doing additional engine performance modifications.
- Direct injector control technology from Dynojet manages the fuel curve on models that do not have the sensors to monitor fuel adjustment.
- Port provides an instant, problem-free way to connect your Power Commander to a computer.
- USB cable and 9V battery power adapter are included.

HMF DOBECK OPTIMIZERS

- Takes tuning the air fuel ratio on EFI machines to the next level.
- The latest GEN III technology is used to provide the most accurate and easiest method of tuning your machine possible.
- Writes the codes to coincide with our slip on/systems, this means that we have settings that will WORK out of the box to get you going NOW.
- Do you have a heavily modified engine, no problem because WE write the code we can make a "special" code to satisfy your machines needs.
- Easy to install, simply plugs into the existing wire harness.
- No outside computer needed to make adjustments.
- Make tuning adjustments similar to tuning a carburetor.
- Key pad menu and + / - values make adjusting simple, even when riding.
- Water and shock resistant.
- HMF writes the EFI map code in house on our dyno to match our systems.
